

ARC 213
DESIGN PROJECT

COURSE DESCRIPTION:

Prerequisites: ARC 111, ARC 112, and ARC 114

Corequisites: None

This course provides the opportunity to design and prepare a set of contract documents within an architectural setting. Topics include schematic design, design development, construction documents, and other related topics. Upon completion, students should be able to prepare a set of commercial contract documents. Course Hours Per Week: Class, 2. Lab, 6. Semester Hours Credit, 4.

LEARNING OUTCOMES:

A student who successfully completes this course should be able to:

- a. Develop and draw light construction details (type 1 and 2 as defined in NC building code)
- b. Design a functional building using commercial construction techniques
- c. Perform preliminary code research under supervision
- d. Solve drafting and design problems for steel and/or concrete wood construction
- e. Understand the relationship of building codes as applied to commercial construction technology
- f. Size up major structural components as applied to commercial construction technology

OUTLINE OF INSTRUCTION:

- I. Brief Introduction to Building Codes, and Administrative Law for the project
 - A. Planning the building and construction documents
 - B. Research and details
 - C.

- IV. Wall Sections:
 - A. Symbols
 - B. Dimensioning
 - C. Layout

- V. Foundation Systems:
 - A. Symbols
 - B. Dimensioning
 - C. Layout

- VI. Exterior Elevations
 - A. Symbols
 - B. Layout

- VII. Roof Plan and Details

- VIII. Problem solving concepts
 - A. Methods
 - B. Documentation

- IX. Presentation
